<i>Foreword</i>	1
<i>Introduction</i>	3
“Darwinism in a consumer-driven world”	4
The paradox of the consumer-driven world	6
Adaptability is the key	7

Part I

The four nature-inspired models in a consumer driven world

1. Major changes in the consumer and business environment	11
From pre-digital to digital consumers	12
From the digital consumer to the “hybrid” consumer: Half human, half digital	13
Changes in consumer behavior and expectations: Love your customer	14
Changes in data management	16
So everything is changing: How best to respond?	17
2. 1st Nature-Inspired Model: Develop symbiosis	19
Symbiosis in business	20
The “five forces” framework	21
3. 2nd Nature-Inspired Model: Enhance migration	23
Migrate closer to consumer environment and habits	23
Types of business migration	24

4. 3rd Nature-Inspired Model: Supercharge your instinct	29
What biology can tell us about data processing	30
Instinct and consciousness	31
Parallels in business	31
5. 4th Nature-Inspired Model: Leverage natural selection	35
The three principles of evolution	35
Applications in business, technology and economics	36
Flip the product development funnel	37
Create variety	38
Test and learn through natural selection	40
Become an agile company	40

Part II

Entertain and empower your customers

6. You need to become an entertainment company!	45
The brave, new, customer-focused world	45
No rich brand experience without creating content	46
New skills and tools	48
Setting up a digital excellence department:	
The final stage in the evolution	50
7. Deliver premium service through self-service	53
The self-service paradigm	53
Premium service is self-service that customers want and will use	54
What is the future of service?	57
8. Boost customer commitment through co-creation	59
How to grant a new product-development role to customers	60
New product development roles for the “active” customer	61
Two ways to take open innovation a step further	63
ROI: Return on investment, or risk of ignoring?	64
9. Preparing for a mobile-only future	67
The “trucks, cars and bikes” of computing	67
For many, “mobile only” is already here	69
Envisioning “mobile-only”	69
Start by building the right foundation	71

10. The future of retail	73
What we do know about retail trends and evolution?	73
What might retail look like in 10 years?	76
What is the winning retail strategy?	78
What if the future of retail is just about being “a good merchant”?	82
11. Leverage emerging markets’ digital experience	85
Sweeping away old ideas	85
Emerging countries: The new world laboratories?	87
Harnessing reverse innovation	88

Part III

Trust and protect your customers

12. Become a trusted third party	93
Trust: A crucial enabler of growth in the digital era	93
Embedding trust and customer-focus in a company	95
13. Migrate and build your own market-place: A new “habitat” for your business	99
Market-places as a three-way win-win model	99
Building and operating a market-place	102
14. Realizing and monetizing the personal data opportunity	107
Data powers services of value to consumers	108
Monetizing data? Reliable and valid data methods are essential	109
No data without consumer trust: Earn it and maintain it	111
Be sensitive to consumer expectations (it needs to be cool, not creepy)	112
Consumers are co-producers: Incentivize them with service, control and money	112
Provide a unified online-offline experience	114
15. Big data: Open your intuition	117
A big data challenge still too scarcely adopted	118
Using big data wisely	119
Using an open intuition approach	120

16. Shift your view from campaign efficiency to interaction mix efficiency	123
A new approach for monitoring interaction mix and not just campaign ROI	124
A new approach for optimizing interaction mix	126
Retail: A successful study of the optimal interaction mix	126
With new analytical artificial intelligence tools, what changes?	127
17. How to build a “customer-for-life” relationship	129
Traditional loyalty programs are on the decline	129
From “earn & burn” to “surprise & delight”	130
Focus on customers’ expectations to make them feel unique	131
Leverage digital innovations and social media to develop rituals	133
Loyalty is not just about loyalty schemes	134
18. Simple and secure: New transaction models	137
Our definition of “mobile payment”	137
Simple versus secure?	139
Some examples of simple mobile payment transaction models	140
Some examples of secure mobile payment transaction models	141
Outlook: Electronic money may overtake physical cash	143
19. The future of customer service: “Rage against the machine”?	145
How does digital transform customer usage, behavior and expectations?	145
Technology’s influence	148
Beyond automation	152

Part IV

Over-deliver on customer management operations

20. Becoming digital by default	157
1. Develop an incremental digital journey	158
2. Define and disseminate the rules for digital	158
3. Increase agility to overcome structural inertia	159
4. Develop a digital culture and dare to fail	159
5. Prioritize what you measure; measure what you prioritize	160
6. Build a digital business on data insights	161

21. Customer ecosystems	163
The challenges and opportunities of turning data into insight	163
Don't underestimate the ability to anticipate	164
Ultimately, what gets done is what gets measured and rewarded	166
22. How ready is your company for digital disruption?	169
Understand the trends and innovations	170
Digital is an evolution rather than a revolution	171
A model for assessing digital maturity	171
One step at a time	173
23. IT architecture for a multi-channel world:	
It's time to migrate!	175
Key trends	175
These trends give rise to some key critical capabilities	176
But there will be obstacles	177
A new framework for IT architecture	178
24. Unleash your e-commerce potential	
by becoming an e-category captain!	181
Distribution platforms	181
How does one become an e-category captain?	183
Beating competitors to the status of e-category captain	185
25. Designing a digital delivery ecosystem	187
A sourcing model must match a dedicated digital strategy	189
Teamwork is key to an effective digital platform	191
Find the right balance between local and global	192
Making the most of a digital platform	192
26. Not your father's CRM platform	195
The new CRM metrics	196
Why does simple matter?	196
Getting there requires being connected	198
Being everywhere customers want you to be	201
What if I'm a B2B company, not a B2C company?	201
Customer experience – from outside in	202
27. Create a "digital academy" to foster digital integration	205
The transition to a digital organization: Stakes and methods	205
From innovative projects to full digital integration	207

28. New role of the human resources director	209
New uses, practices and expectations for companies	209
An opportunity for the HR function to gain value and legitimacy	211
Appoint a chief data officer and leverage big data for HR excellence	211
Recruit DJs rather than composers!	212
The need for greater openness	212
29. B2B: Mirroring B2C and going beyond	215
Keep the customer at the center, building on actual digital usages	215
Use digital to enrich offers and services	217
Prepare for disruptive business and distribution models	219
<i>Conclusion</i>	223
